Maths

1. Calculate $4,390 - 1,204$. [1 mark]
2. Find $12/20$ of 60. [1 mark]
3. Solve $7x + 7 = 126$. [1 mark]
4. A rectangle is 20 cm by 6 cm. Find its perimeter. [1 mark]
5. 7 books cost £5.75 each. You pay with £50. How much change should you receive? [1 mark]
6. Calculate $9,051 - 134$. [1 mark]
7. Find $14/20$ of 100. [1 mark]
8. Solve $7x + 3 = 52$. [1 mark]
9. Two angles in a triangle are 39° and 59° . Find the third angle. [1 mark]
10. 7 books cost £6.50 each. You pay with £50. How much change should you receive? [1 mark]

English

The Old Map

The map had been folded so many times that the paper had become soft along its creases. Arjun found it inside a book his grandfather had left on the highest shelf. No treasure was marked with a dramatic red

cross. Instead, tiny pencil notes appeared beside ordinary places: 'best view at dusk', 'blackberries in August', 'shortcut when the river is low'. The map was less a guide to hidden riches than a record of attention. Arjun began to understand that his grandfather had been collecting moments rather than objects.

- 11.** Give one detail that establishes the setting. [2 marks]

- 12.** What can you infer about the main character? Use evidence. [2 marks]

- 13.** Explain the effect of one carefully chosen word or phrase. [2 marks]

- 14.** Summarise the main change or development in the passage. [2 marks]

Answers / guidance

1. 3186
2. 36
3. 17
4. 52
5. £9.75
6. 8917
7. 70
8. 7
9. 82
10. £4.50
11. Any precise setting detail supported by the text.
12. State a plausible trait/feeling and support it with evidence.
13. Identify a word/phrase and explain the impression it creates.
14. Concise summary of the central development.
